HARROLD'S REVIEW

January 10, 1951

Vol. 10, No. 1

HARROLD'S PANSY GARDENS & GREENHOUSES

P. O. BOX 29 — GRANTS PASS, OREGON.

1951 BRINGS IMPROVEMENT AND CHANGE

Continuing and expanding our offerings of popular and novelty Annual Flower seeds, we are combining this department and catalogue with our regular wholesale offer this year. There has also been a simplification of the listing formula on these seeds which will make it still easier for you to estimate your requirements and make up your order. ANOTHER INNOVATION is the elimination, wherever possible, of the usual premium markup in small quantities. Complete elimination of this is not possible at this time but it will be noted that on a great many items you pay no more for the smallest listed quantity than you do for a full ounce. This is a price advantage you can obtain from no other seedsman. Expansion of this policy will depend on the acceptance given it by the trade.

PANSY AND PERENNIAL PLANTS ARE SHORT

Losses due to flood and the wettest fall season on record has reduced the available supply of these plants for the balance of this season. No further offering of Pansy plants can be made until next September although in many localities you can plant seeds of these for your spring sales yet. A complete stock of seeds is available. Perennial supply is spotted and aside from the limited offering made here more complete listing will have to await an appraisal of the damage from this wet fall. Some further stocks will be available and when offered will be of highest quality.

GLADIOLUS BULBS

The listing of these made here is most extensive and good stocks of the most valuable newer commercials are available this year. It is possible that the larger sizes in many sorts will be sold out before the close of the season; some are getting a bit short now. It is suggested in all cases that you cover your needs as early as possible.

BEGONIA TUBERS

Harvest is later than usual this year but crop prospects are good. It is not known at this time just what we can offer at wholesale after our retail requirements are set aside. A surplus list of these will be published later if anything can be offered.

Southern Oregon Grown

GLADIOLUS BULBS

This year there has been a rather extensive change in the variety selection of the Famous Rogue River Valley Gladiolus. Many of our local growers have overhauled their selections for culture and this combined with heavier production in the newer improved commercials is making selections of much improved variety and color range available at very attractive prices.

Many old sorts have been completely discontinued because they have been replaced with better varieties in the same color class. These changes have been due to two factors. In many cases the newer sorts have a more robust, healthy constitution while in other cases the change has been desirable because of better flowers of more commercial value. You will find this list one of the most up-to-date and valuable in the country.

Sales have been about normally active this season so far and much shipping to jobbers in car lots is now out of the way. The varieties offered here are still in fair supply in the sizes offered at time of going to press. It may be expected, however, that the largest sizes, usually No. 1 and 2, will clean up first. Of necessity this offer must be made subject to availability so if you need large bulbs early ordering is advisable. It is suggested that where possible you make second choice or permit us to substitute a near variety if item ordered is sold out. In all cases we will automatically raise or lower the grade one size from that ordered in the event size ordered is out and either of the others are available, unless of course, you specifically state that this is not acceptable.

Pansy Seeds

PLANT NOW FOR SPRING PLANTS

Pansy seeds may now be planted in flats, indoors, up to February 20th and still produce nice plants for late April and May sale. They may be shifted into cold-frames quite early as they stand a good deal of frost without damage and so take a minimum of valuable greenhouse room once they are well started.

Viola Seeds

THE MOST VALUABLE AND OUTSTANDING VARIETIES

Have you considered Violas recently? They are a useful addition to your Pansy line and in many places where they have been offered they have developed a profitable demand. Normally this demand will usually not exceed 10% to 25% of your Pansy demand but in many instances that is definitely worthwhile.

The culture is so identical with that of Pansies that they may be planted and handled in the same way with very satisfactory results. They may be set in fall or spring into the flowering beds in the same manner and if any difference is noted it is that they are a bit harder and more easily wintered than Pansies. We suggest that if you haven't tried them yet in your market you make a planting of three or four packets in the most popular colors and see how easily they are grown and how the customers go for them once they see some of these modern varieties in bloom.

Hardy Primula Seeds

Primula Polyanthus-Veris Hybrids

HARROLD'S PEDIGREED GIANTS

Developed in our breeding department after many years of intensive work we believe this to be the finest in this type. The plants are pleasingly compact but of robust growth, usually from 8 to 10 inches high under good culture. Flower stems are 12 to 16 inches with flowers well above the foliage. The flower heads, composed of many florets which are often individually larger than a silver dollar, are often 8 inches or more across. Coloring is the most brilliant of any strain available in this type. While available in mixed colors only, the blend contains yellow, red, purple and white in the more common shades plus pink, flame and bronze shades in pastel and poly-chrome combinations that are rare. A few blue shades are in the mixture. Marking of the flowers is just as outstanding with self, blotched and laced markings in the flowers.

FRESH TESTED SEEDS

Price per Trade Packet about 300 seeds \$1.00; 3 for \$2.50; $\frac{1}{8}$ oz., about 1500 seeds, \$4.00; $\frac{1}{4}$ oz., \$7.50; $\frac{1}{2}$ oz., \$14.00; 1 oz., \$25.00; 2 ozs., \$45.00.

PRIMULA PLANTS

HARROLD'S PEDIGREED GIANTS: These are coming year old now and are available in limited number only. Just a few thousand. PRICE, 25 for \$3.00; 50 for \$5.50; 100 for \$10.00; 250 for \$20.00 postpaid.

OTHER HARDY POLYANTHUS

OREGON GIANTS — A giant strain from an outstanding Oregon specialist including the best of his collection. Of giant size and wide color range which is heavy in the softer shades. A very fine mixture.

OLYMPIC GIANTS — Still another strain from two outstanding collections grown in Washington State. Basically from Pfitzer's Colossea and English types but rebred to American habit and color standards. All of these types are better suited to American markets and climates than fresh imports.

SEED PRICES: These two — Per packet, about 300 seeds, \$1.00; $\frac{1}{8}$ oz., \$3.50; $\frac{1}{4}$ oz., \$6.50; $\frac{1}{2}$ oz., \$12.00; 1 oz., \$22.00; 2 ozs., \$40.00; 4 ozs., \$75.00.

RHUBARB ROOTS

MYATT'S VICTORIA: An old favorite for home and market. Heavy producer where conditions are favorable. PRICE NOT PREPAID, 50 for \$3.00; 100 for \$5.50; 250 for \$12.50; 1,000 or more for \$45.00 per 1,000.

MAMMOTH: One of the largest and excellent for winter forcing. PRICE NOT PREPAID, 50 for \$4.00; 100 for \$7.50; 250 for \$17.50; 1,000 or more for \$60.00 per 1,000.
